Kansas	122		49	40%	1,063	1,196	284	809	135	17%	798	140	26

1. **HHS Protect** statistics are based on the most recent of 12/9 – 12/14 self-reported entries to the HHS Teletracking system . The Hospitals Reporting indicates the number of facilities reporting at least one data point for the day

1a. KC Metro District is based on the county where the hospital resides. NOT the patients county of residence. KC Metro includes data submitted by hospitals in Kansas and Missouri within the Kansas City Metro area counties: Johnson, Leavenworth, Miami, Wyandotte in Kansas and Bates, Cass, Clay, Clinton, Jackson, Lafayette and Ray in Missouri.

2. **KDHE** data updated Monday, Wednesday, and Friday <https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas> KDHE Data DOES NOT include any Missouri Resident Data.

3. A case is defined by a person who tested positive for the novel coronavirus (SARs-CoV-s), which causes Coronavirus Disease 2019 (COVID-19). Confirmed and probable cases are reported in this dashboard. A probable case is defined as a person with a) presumptive lab evidence (serology) with COVID-19 symptoms or epi-linked to a confirmed case, or b) no lab testing with COVID-19 symptoms and epi-linked to a confirmed case. - Last updated 12/14/2020 – Based on statistics from KDHE for Kansas residents

*The number of Adult Staffed ICU Beds available is derived by subtracting the reported number of Adult Staffed ICU Beds Occupied from the reported Total Adult Staffed ICU Beds. And, this includes ALL patients, not only COVID patients.

***Number of patients with suspected or laboratory-confirmed COVID-19 who died on the previous calendar day of reporting in the hospital and hospital ED.
